# CleanFOAM DOORway

304

 $\epsilon$ 

| MATERIAL                                  | Stainless Steel housing and connections |
|---|---|
| WEIGHT                                    | 12 kg                                   |
| MAX. DIMENSIONS (WxHxD)                   | 624 x 460 x 122 mm                      |
| MOUNTING HOLES DIAMETER AND SPACING (WxH) | ø7 mm; 570 x 190 mm                     |
| DOSING RANGE                              | 0,3-8%                                  |
| MIN. WATER FLOW FEED                      | 30 l/min                                |
| WATER INLET                               | EXT 1/2"                                |
| WATER OUTLET                              | Female quick coupling 1/2"              |
| WATER PRESSURE                            | 18 - 25 bar                             |
| AIR OUTLET                                | ø6 mm                                   |
| MIN. AIR FLOW (FEED)                      | 150 I/min                               |
| AIR PRESSURE (FEED)                       | 5 - 8 bar                               |
| NUMBER OF PIECES IN THE PACKAGE           | 1                                       |

## Clean FOAM DOORWay

- Flexible device suitable for disinfecting footwear and wheels;
- Disinfection takes place by walking/driving over the applied chemical agent;
- It effectively separates areas with different hygiene levels;
- Time -based programming;
- An injector dedicated to medium water pressure.

#### **TECHNICAL DRAWINGS WITH DIMENSIONS**

### **MAINTENANCE**

The housing is made of stainless steel. Its anti-corrosion properties depend on the conditions in which the steel is used and its maintenance. Stainless steel products should be cleaned, dried and maintained with products intended for this purpose. Particular attention should be paid to the regime of cleaning for products used in an environment of high salinity or humidity to prevent sediments accumulation.
