FOOD HYGIENE EQUIPMENT

- Solid and durable.
- Hygienic safe protection cover with slots, that prevent water and pollution from accumulating in the valve.
- Ergonomical design, hexagonal ball valve protection cover shape ensures comfort of use.
- Low valve mass reduces the effort required to operate it and increases work efficiency.
- Made of high-quality materials, ensures reliability and long life even with intensive use.
- The valve is equipped with a stopper of the operating range of the butterfly, which enables the control of the degree of opening and closing of the valve.
- The safe protection cover eliminates the possibility of undesirable rotation of the butterfly.
- Available with female quick coupling (also in SAVE WATER version) and with swivel.
- All colours of the quick coupling cover are made of material with an antimicrobial additive.
- The quick coupling covers are also available as detectable versions - by metal and X-Ray detectors.
- The safe protection cover protects hands from water temperature and prevents slipping of the valve from hands.
- Extra POM seal included.
- Sets of 8 ball valves sold in carton box available.
